Covid19 in Bhutan.

Bhutan lies between two giant countries, China to west and India to south. it consists of 7,54,394 mankind. Bhutan shares a total geographical boundaries of 38,394 km square over the Asia. 78% of the geographical boundaries of the country is covered by the forest and Bhutan is one of the greenest country in the world. Bhutan was considered as first carbon free country in the world and it also considered as a last Shangrila in the glove.

However, with the outbreak of Covid19 pandemic throughout the glove, Bhutan also had first positive case of covid19 on 6th March 2020 and as of now the total positive case increased to 67, 22 were fully recovered and no one lost their soul. So due to the outbreak or in order to prevent from the outbreak, the country started system called work from home and also the schools, institutions and universities were closed.

Phuntsho Wangdi, 23 years old from Bji gewong.Haa Dzongkhag is a Final Year student Pursuing Bachelor of Arts in Dzongkha and History from Royal Thimphu College, Thimphu. He shares his story "With the outbreak of COVID-19, 'each and every citizen are urged to stay back at the respective homes in order to reduce the risk of getting and spreading the disease and also social distancing is mandatory. With closing of all the schools, institutions, universities and organization causes some negative impacts.

However, it gives me opportunities or more time to help my parents along studying. With the outbreak of COVID-19 impacted the country in many ways but it gives me new experience and knowledge. Such as it is first time E- learning has been introduced in our country education system and also first time in my life. I spent my time in doing assignment, presentation, attending online classes and helping my parents. I urge everyone to cooperate with our government to fight this battle. Stay safe, stay fit."
